VIDEO SAFETY SOLUTIONS

## Video Safety Solutions NEW!

*Video safety is the route to building an advanced fleet management program. Video safety solutions provide unmatched insights, data, and analysis that continuously drive not only business efficiency by reducing driver risk but also bring the unparalleled advantage of improving driver behaviour and performance. With video telematics solutions you can protect drivers, freight, passengers while steadily growing your business.*

**VIDEO SAFETY SOLUTIONS**

## Video Safety Solutions

### Liability Risk Prevention

- 200 hours plus of incident video recording to prove driver's innocence in case of mishap\*
- Event Footage available for upto 6 months on the cloud\*\*

### Advanced Driver Assistance System (ADAS)

- Dual channel dashcam to detect and report road facing and driver facing events.
- In-cab customisable audio alerts for adverse events such as forward collision, lane drifting, speed limit violations, distracted driving, stop sign violations and more.

### Driver Management System (DMS)

- Driver facing camera that tracks drowsiness, Cell Phone Usage, Face ID, and distracted driving

*\* Storage depends on SD card which needs to be bought separately*

*\*\*Event Footage is automatically uploaded to cloud and retained for 6 months;*

*Dash Cam needs internet connectivity to upload the footage to cloud*
